Questions Correct (%)

Each statement has a fixed number of marks available in each assessment version.

The question percentage outcome represents the number of those available marks that the learner achieved.

100% means the learner achieved all available marks for that statement.

60% would mean the learner achieved just over half of the available marks for that statement.

*Both **Totals** represent the overall result outcome for the learner – this learner has achieved 53% of all available marks. (Decimals will be rounded for the final result)*
