

An adaptation to the Professional Practice Portfolios Units 8 and 15 mapped to DfE EYE criteria

The risk rated approach assures that Early Years Educator learners have met the DfE EYE criteria in full and that sufficient evidence has been provided. Please refer to the '**Risk -rated approach to DfE EYE criteria guidance**' document that can be found on the qualification's webpage on Qual Hub.

The key to the colour coded risk rated approach guides assessors by identifying the types of assessment methods that can be used to generate evidence. To help further an adaptation to the Professional Portfolio 1 and 2 from Units 8 and 15 has been developed please see below for further details.

This adaptation clearly identifies criteria from the risk rated approach relevant to **NCFE CACHE Level 3 Diploma in Childcare and Education (Early Years Educator) (601/4000/8)**, therefore supporting efficient evidence generation in line with the EYE criteria. The Professional Practice Portfolios may be claimed in full as long as all criteria identified through the risk rated approach has been met sufficiently.

The integrity and rigour of the qualification is upheld through this approach and learners will be prepared for work or further study with the underpinning knowledge and skills they need to enter the workforce at Level 3.

In addition to providing evidence in line with this risk rated approach, learners must achieve all of the graded knowledge units within the qualification.

Key	
Grey	Knowledge only assessment methods
Green	Suitable alternative assessment methods
Amber	Alternative assessment methods to be used with caution where assessor is unable to access for direct observation and is relying on EWT. These criteria must be observed.
