Introduction

Timings

You have 4 hours 30 minutes to complete the tasks within this assignment. Your tutor will provide details of how this time will be split up, and over how many sessions.

The time allocation for assignment 4 is 4 hours 30 minutes, divided as:

- task 1 – 2 hours 30 minutes
- task 2 – 2 hours

Scenario

You work at the production site of a food factory. The company has recently employed a new factory manager for the site.

Performance outcomes (PO)

PO4: Collect, analyse and interpret food production data

Task 1: collect, analyse and interpret food production data

Your new factory manager wants to have a better understanding of your site. They have asked you to analyse relevant data on customer requirements, food safety, productivity and quality and present it to them in a report.

You will be provided with the raw data you will need in a spreadsheet format. You may use spreadsheet software, or any other appropriate software to analyse and present this data for your report.

(24 marks)

2 hours 30 minutes

Your report must include, as a minimum:

- an analysis of the data to identify 4 trends
- presentation of the data clearly and unambiguously
- the identification of any out of tolerance results and corrective actions applied
- the identification of any errors, omissions, or areas for further investigation in the records

Task 2: continuous improvement opportunities

Based on your analysis:

- describe 3 opportunities for continuous improvement, such as process improvements or cost savings
- discuss potential technological solutions to reduce any errors in data collection, including the advantages and disadvantages of each suggested solution

(18 marks)

2 hours
