Assessment guidance

Delivery and assessment

Learning outcomes 2, 3, 4, 5, 6 and 7 must be assessed in a real work environment.
This unit must be assessed in line with Skills for Care and Development Assessment Principles.
This unit must be taught in context of legislation and statutory guidance followed in Northern Ireland.

Types of evidence

Evidence could include:

Positive Behavioural Support:

An approach to intervention from social, behavioural, educational and biomedical science that emphasises proactive, preventative strategies to achieve reductions in challenging behaviour and improved quality of life. Positive Behavioural Support (2003).

Formal assessments must be undertaken by those who are professionally qualified to do so.

Others:

- the individual accessing provision
- family members
- paid carers
- advocates
- other professionals.

Behavioural assessment reports refers to a detailed report on an individual based on a functional analysis of their behaviour. The report should include such information as personal history and service use, health status, strengths and needs, motivational analysis, operational description of behaviours, risk factors, early indicators, slow and fast triggers, maintaining consequences and summary statements or hypotheses.

Indirect assessment schedules refers to assessments of skills, behaviours, mental health, participation in activities and so on, usually administered by interview with carers.

Direct observation data refers to information on an individual's behaviour collected through directly observing them using structured methods, such as ABC charts, Scatterplots, Momentary Time Sampling, Continuous Time Sampling, Partial Interval Recording and so on.

Triangulate refers to the drawing together of results from a variety of different sources, to assess consistency in findings.

Types of evidence (cont'd)

Challenging behaviours:

- repetitive/obsessive
- withdrawn
- aggressive
- self-injurious
- disruptive
- anti-social or illegal
- verbally abusive.

Primary prevention refers to strategies that involve changing aspects of a person's living, working and recreational environments so that the possibility of challenging behaviour occurring is reduced.

Challenging:

- competence and capacity of settings
- social norms
- frequency, intensity
- duration and ability to communicate.

Schedule of structured activities is a detailed daily participation plan for an individual that includes scheduled and optional activities, and indicates who will provide the necessary support to maximise participation throughout the day.

Skill-teaching refers to structured developmental work undertaken with an individual to teach specific skills that may reduce their challenging behaviour. It can include a full teaching plan and detailed teaching steps based on task analysis.

Social validity refers to interventions that are ethical. That is, they address socially significant problems, have clear benefits for the individual, are acceptable to the individual and others, and use the least restrictive or intrusive approach.

Secondary prevention refers to strategies that apply when a person's challenging behaviour begins to escalate, in order to prevent a major incident.

Non-aversive strategies are designed not to be unpleasant for the individual: they avoid pain and punishment and can include physical interventions that comply with the British Institute of Learning Disabilities (BILD) Code of Practice for the use of physical interventions.

Aversive strategies are punishment based. They work by causing an unpleasant experience for the individual, such as pain, discomfort, seclusion, infringement of rights, removal of possessions and so on.

Reactive strategies are ways of responding to challenging behaviours that have not been prevented.

Positive Monitoring is a process that avoids managers being distanced or having a mainly administrative role, by helping them maintain close contact with service users and staff in a structured and constructive way. It specifies exactly what staff need to do, with managers giving frequent feedback on what they are doing well, identifying areas for improvement and helping them to find solutions (see Porterfield, 1987).

Periodic Service Review provides a way of improving and maintaining the quality of services committed to implementing PBS. It is based on positive behavioural approaches to staff management and focuses on motivating and supporting staff to improve service quality (see LaVigna, et al, 1994).

Assessment guidance

Delivery and assessment
<p>Learning outcomes 1, 2, 3, 4 and 5 must be assessed in a real work environment. This unit must be assessed in line with Skills for Care and Development Assessment Principles. This unit must be taught in context of legislation and statutory guidance followed in Northern Ireland.</p>
Type of evidence
<p>The nature of this unit means that most of the evidence must come from real work activities. Simulation can only be used in exceptional circumstances, for example: where performance is critical or high risk, happens infrequently or happens frequently but the presence of an Assessor/observer would prevent the Independent Advocacy relationship developing.</p> <p>Simulation must be discussed and agreed in advance with the External Verifier.</p> <p>The evidence must reflect, at all times, the policies and procedures of the workplace, as linked to current legislation and the values and principles for good practice in independent Advocacy.</p> <p>Direct observation and/or expert witness testimony are the required assessment method to be used to evidence some part of this unit.</p> <p>If the Assessor is unable to observe the learner, s/he will identify an expert witness in the workplace who will provide testimony of the learner's work-based performance. The Assessor or expert witness will observe the learner in real work activities and this is likely to provide most of the evidence for the assessment criteria for this unit.</p> <p>The Assessor will identify other sources of evidence to ensure the most reliable and efficient mix of evidence gathering methods from the list below. This will ensure that all learning outcomes and assessment criteria are met and that the consistency of the learner's performance can be established.</p> <ul style="list-style-type: none">• Work products• Professional discussion• Learner/reflective accounts• Questions asked by Assessors• Witness testimonies• Projects/assignments/RPL• Case studies

Explanation of terms

Explanation of terms

This table explains how the terms used in the unit content are applied to these qualifications (not all verbs are used in these qualifications).

Analyse	Break the subject or complex situation into separate parts and examine each part in detail. Identify the main issues and show how the main ideas are related to practice and why they are important. Reference to current research or theory may support the analysis.
Critically analyse	This is a development of 'analyse' which explores limitations as well as positive aspects of the main ideas in order to form a reasoned opinion.
Clarify	Explain the information in a clear, concise way showing depth of understanding.
Classify	Organise accurately according to specific criteria.
Collate	Collect and present information arranged in sequence or logical order which is suitable for purpose.
Compare	Examine the subjects in detail, consider and contrast similarities and differences.
Critically compare	This is a development of 'compare' where the learner considers and contrasts the positive aspects and limitations of the subject.
Consider	Think carefully and write about a problem, action or decision showing how views and opinions have been developed.
Demonstrate	Show an in-depth understanding by describing, explaining or illustrating using examples.
Describe	Provide a broad range of detailed information about the subject or item in a logical way.
Discuss	Write a detailed account which includes contrasting perspectives.
Draw conclusions (which ...)	Make a final decision or judgement based on reasons.
Evaluate	Examine strengths and weaknesses, arguments for and against and/or similarities and differences. Judge the evidence from the different perspectives and make a valid conclusion or reasoned judgement. Apply current research or theories to support the evaluation.
Critically evaluate	This is a development of 'evaluate' where the learner debates the validity of claims from the opposing views and produces a convincing argument to support the conclusion or judgement.

Explain	Apply reasoning to account for how something is or to show understanding of underpinning concepts. Responses could include examples to support these reasons.
Identify	Apply an in-depth knowledge to give the main points accurately (a description may also be necessary to gain higher marks when using compensatory marking).
Justify	Give a detailed explanation of the reasons for actions or decisions.
Reflect	Learners should consider their actions, experiences or learning and the implications of these in order to suggest significant developments for practice and professional development.
Review and revise	Look back over the subject and make corrections or changes based on additional knowledge or experience.
Summarise	Give the main ideas or facts in a concise way to develop key issues.
