

Delivery Guide

NCFE Level 1 Technical Award in Music Technology (601/6777/4) NCFE Level 2 Technical Award in Music Technology (601/6774/9) NCFE Level 1 Technical Award in Music Technology (601/6777/4) NCFE Level 2 Technical Award in Music Technology (601/6774/9)

Delivery and assessment plan

- 1. This plan is based on 2-year delivery and an average timetable of 2 hours per week, 38 weeks per year. This will change with school timetable, festivals and holidays, training days, school events, study leave arrangements, which day lessons occur on etc.
- 2. This is only an example centres may choose to deliver and assess units in a different order, taking into account the timings of the external assessment.
- 3. Guided Learning Hours (GLH) are 30 GLH each for Units 01 and 02 and 40 GLH each for Units 03 and 04.
- 4. External assessment dates vary please check here for details www.ncfe.org.uk/schools/v-certs/assessment-windows
- 5. The first External Quality Assurance visit by NCFE should take place after the first Internal Quality Assurance activities have taken place within the centre. This will provide support and guidance on your delivery and assessment. It's advisable that grading of each unit takes place as soon as the learner has completed the Internal Assessment Tasks. These will need to be Internally Quality Assured and grades uploaded to NCFE. All External Quality Assurance visits will need to be scheduled in advance with the External Quality Assurer to ensure availability. Please refer to this guide for details https://www.ncfe.org.uk/media/828460/internal-assessment-writing-and-delivery-guidance.pdf
 Please also see sample internal assessment briefs here https://www.ncfe.org.uk/media/829410/601-0048-5-l2-cert-in-business-and-enterpriseinternal-assessment-sample-tasks-issue-1-july-2014.pdf
- 6. Once the agreed grades have been 'banked' by the External Quality Assurer (first attempt) the learners should be provided with an opportunity to add to their assessed evidence to improve their grade as soon as is practicable (second attempt). This will ensure that the unit is still fresh in their minds and the additional evidence should then be assessed and Internally Quality Assured in preparation for External Quality Assurance. You are entitled to 2 free visits for each registered group of learners from your External Moderator. You can request additional visits from your Centre Support Assistant however these are chargeable.
- 7. This is how we propose the qualification should be delivered over two years, with synoptic external assessment at the end, however centres are free to deliver the qualification in a way that suits their timetable.

Scheme of work

Below is a scheme of work that you may choose to follow when delivering the NCFE Level 1 Technical Award in Music Technology (601/6777/4) and the NCFE Level 2 Technical Award in Music Technology (601/6774/9).

- Internal Assessment Sample Tasks to support this scheme of work are available on our website www.ncfe.org.uk
- It's designed to offer centres some ideas for delivery of these qualifications; it does not represent the detail of lesson planning necessary in many schools eg starter/plenary activities, homework tasks, literacy and numeracy.
- All activities are examples only and can be substituted to suit the individual situation of the school, Teachers and learners.

This scheme of work is based on delivery over 2 years, allowing flexibility with 2 opportunities to sit the external assessments. The 140 GLH are split up over 76 weeks with 2 hours' delivery each week including time for revision for the external assessments.

NCFE Level 1 Technical Award in Music Technology (601/6777/4) NCFE Level 2 Technical Award in Music Technology (601/6774/9)

Unit Number	Learning Outcome(s)	Teaching and Learning Activities	Assessment	Notes

01	LO1 LO2 LO3	Course introduction – Outline course structure. Explain internally assessed units and external assessment unit weightings.	In delivery sessions learners will become aware of the features
	103	Delivery – Teacher-led workshops to provide knowledge of LO1 and LO2 content prior to assessment.	and terminology associated with a DAW, allowing them to
		This could be undertaken by, for example, a series of sessions following the pattern of Teacher-led demonstrations followed by learners working on short tasks as a workshop.	approach assessment of LO1 with confidence.
		Teacher-led practical demonstration of the following elements of a DAW:	
		 computer (eg operating system) computer peripherals/hardware (eg external hard drives, USB devices, headphones, speakers) track types 	
		☐ differences between audio, software instrument and MIDI within software.	
		Discussion of alternative hardware/software and file organisation.	Short
		Workshop. Configuring preferences and setting up a project.	practical/compositional tasks during delivery
		Set learners a challenge to create a video/presentation/screencast that describes the differences between audio, software instrument and MIDI tracks.	will allow learners to approach assessment of LO2.
		To familiarise themselves with evidence collection methods, learners could record themselves completing workshop tasks on	

video or using annotated photos and create a short composition in the process.	

NCFE Level 1 Technical Award in Music Technology (601/6777/4) NCFE Level 2 Technical Award in Music Technology (601/6774/9)

Unit	Learning	Teaching and Learning Activities	Assessment	Notes
Number	Outcome(s)	reaching and Learning Activities	Assessment	Notes

Keyboard and other MIDI controllers

Teacher to demonstrate how to set up a MIDI controller keyboard and at least 1 other MIDI controller (eg MIDI guitar, pad controller, wind controller).

Workshop. Set short MIDI recording task to enable learners to practise setting up for and recording from different controllers. Learners could be asked to input specific parts or data using specific controllers (eg applying input creatively – using pads to input drum part).

Software instruments:

- · synthesisers
- samplers

Teacher to demonstrate how to open up software instruments in sequencer and change simple parameters to manipulate the sound.

Workshop. Editing software instruments (synths and samplers – filter editing, envelope editing).

Set short tasks to enable learners to practise changing the parameters of specific software instruments to create sounds (eg learners could be challenged to reproduce given sounds).

NCFE Level 1 Technical Award in Music Technology (601/6777/4) NCFE Level 2 Technical Award in Music Technology (601/6774/9)

Unit	Learning	Teaching and Learning Activities	Accesment	Notes
Number	Outcome(s)	reaching and Learning Activities	Assessment	Notes

Audio interface:

- · audio preferences set up
- microphone input (including use of phantom power)
- line input
- · audio outputs

Teacher to demonstrate how to set up an audio interface, select appropriate preferences, connect a microphone and instrument, and select an appropriate audio output.

Simple audio editing tools could also be demonstrated here (eg using trim to top and tail a recording).

Workshop. Audio recording (setting appropriate inputs and gain structure for audio capture – basic editing trim/splitting and joining).

Set short audio recording tasks to enable learners to practise setting up for and recording different sound sources (eg could capture instrument sources, vocal sounds, environmental sounds, Foley).

Audio and MIDI editing tools (eg cut/copy/paste, quantise, velocity, trim, reverse, split, fades, automation of volume and pan, automation of software instrument parameters, tempo control).

Teacher to demonstrate how to complete a range of functions using the sequencer's editing tools.

As an alternative delivery idea learners could be introduced to Unit 02 content alongside Unit 01 in this first term.

An assignment brief could then be produced to cover both Unit 01 LO2 and Unit 02 LO2 through development of a stylistic composition.

Similarly Unit 04 content could be introduced side by side and Unit 01 LO2 and Unit 04 LO2 linked.

Learners should be introduced to skills of being able to review and consider their work through delivery.

Workshop. Editing audio and MIDI (arrangement, MIDI edit pages – velocity. Audio editing – reverse, fades. Balance and pan – using automation).	

NCFE Level 1 Technical Award in Music Technology (601/6777/4) NCFE Level 2 Technical Award in Music Technology (601/6774/9)

Unit	Learning	Teaching and Learning Activities	Accesment	Notes
Number	Outcome(s)	reaching and Learning Activities	Assessment	Notes

Set learners a short task to solve the problems in a sequencer project using editing tools (eg removal of unwanted phrases, copy and paste to correct errors, automation to control level).

Plug-ins:

- effects
- EQ
- dynamics processing.

Teacher to demonstrate how to use a selection of plug-ins (eg delay, reverb, chorus, EQ, compression, noise gate) and suggest applications for each.

Workshop. Learners to practise using plug-ins, experimenting with parameters and practising how to use them within short tasks (eg setting gate threshold correctly to cut background noise, using compressor to control vocals, applying reverb to give depth, EQ to attenuate problematic frequencies).

LO3 delivery may include sessions looking at how learners can relate process evidence to strengths and weaknesses and how to derive focused ways to improve (eg class discussion – What makes a good review? What is the purpose of reviewing your own work? What tools can be applied to review?)

Assessment LO1/2/3

Set Unit 01 LO1 assignment.

Set assignment brief.

Following delivery LO1 assignment brief to be set and learners working to produce evidence against the brief.

Use the sample internal assessment tasks from the qualification page on the NCFE website or write your own (an Assessment Checking Service is available from NCFE).

Unit 01 LO1

Learners working to produce evidence. Learner submission of Unit 01 LO1 evidence.

02 LO1 Class delivery to give a broad background of the history of key musical styles from the 1950s onwards, showing how they have grown musically from advances made in technology. This will enable learners to place musical styles in context and help them prepare for completing the research task for Unit 02 LO1. Music history lesson 1 (rock and roll, rock) Music history lesson 2 (folk) Music history lesson 3 (soul, reggae) Music history lesson 4 (disco, dance) Music history lesson 5 (hip hop) **Music history lesson 6 (electronica)** Encourage learners to build a bank of musical vocabulary in regard to key elements (structure, melody, rhythm, harmony, instrumentation) of musical styles. Identification of key elements as related to styles using musical vocabulary. **Activity ideas:** begin to build a family tree as a class that shows the development of music post-1950. Consider key artists, songs,

albums and technology

short quizzes may also be useful as recap in sessions

specific music feature (eg structure) for a particular style.

set learners a challenge in groups to compile information for a

The 'Music History' sessions are an opportunity to expose learners to a variety of musical material and explore how style is informed by the use of musical elements and technology prior to assessment of LO1 for this unit.

Use a range of materials to illustrate the musical features discussed in class, including audio and video examples.

'Who Sampled' website and app could be a useful starting point to engage some learners.

Evidence format idea

Direct learners towards preferred free blog website and demonstrate how to use the site to produce evidence.

Groups present their ideas at the end of the lesson and share findings.

Unit	Learning	Teaching and Learning Activities	Assessment	Notes
Number	Outcome(s)			

Show a media clip with contrasting music (eg horror movie with light-hearted music), in order to demonstrate how important an underscore is and how synthesis and sample manipulation can be used to provide sounds.

Look at examples of computer games where characters move from one area to another and the underscore changes as a result, using examples of synthesis and digital sample manipulation.

Demonstrate how to complete a plan for creating underscore for the example.

Learners should add underscore to working example making use of synthesis and digital sample manipulation.

Bring together working examples and use for discussion of practical processes undertaken in the previous sessions including peer review of work and approaches.

Recap of forms of media. Video games, movies, TV adverts, radio broadcast/podcast, animations, theatre.

Recap of sound creation methods: physical props, environmental sounds, sound synthesis, digital sample manipulation, effects library.

Recap of sound creation types: Foley, ambience, dialogue/voiceovers, underscore.

Discussion of evidence requirements to meet LO3:

Use the sample internal assessment tasks from the qualification page on the NCFE website or write your own (an Assessment Checking Service is available from NCFE).
