Dear Sarah

Product title: NCFE Level 3 Certificate for Mathematics in Everyday Life

We are one of the largest specialist mental-health, learning disability and neuro-rehab Trusts in the country. We employ 6500 staff of which 40% are within Bands 1-4 in a care role as nursing assistants and support workers.

This qualification would support the Academy's aim of supporting staff to increase their skills in mathematics. Mathematics in Everyday Life would enable candidates to see the link between an understanding of mathematical issues and day-day practice at work.

I can confirm that this qualification will prepare students for the mathematical demands of employment.

We support this qualification as designed and are happy for NCFE to use this letter on their website alongside the specification.

Yours sincerely

Annette Connor
